

The Proctor Silex® Plus 1.5 Qt. Slow Cooker

Small size perfect for appetizers and dips

The Proctor Silex® Plus slow cooker is perfectly sized for making appetizers, dips and small meals. The 1.5 qt. capacity oval crock is ideally suited to for entertaining at home or away. The rubberized lid seals tight and is secured by a Lid Latch™ strap, which reduces messy spills. Now worry-free transport is easy!

“A large percentage of consumers own more than one slow cooker,” said Edie Wine, senior product manager for Hamilton Beach Brands, Inc. “This slow cooker was designed for appetizers, dips, and small meals. When attending a party nobody wants to bring cheese dip in a large, bulky slow cooker and the host of the event typically doesn’t have the space available in the oven for a hot appetizer. The Proctor Silex® Plus slow cooker is the perfect solution, and a great value, as well. Use the removable paper labels in the recipe nametag slot to quickly identify the slow cooker’s contents – perfect for a crowded party table.

1.5 qt size is also perfect for small meals. The stoneware can go from slow cooker, to table, to refrigerator for versatile serving and storage.
